

BLACK PULSE TEST CHART

REFLECTANCE

The test chart is used to measure low and intermediate frequency response (streaking) and flare in video systems.

The white background has a density of ~ 0.15 . The black rectangle has a width equal to 25% of picture width (approx. 0.05 MHz). In addition the chart shows a narrow black pulse, width equal to 1% picture width (approx. 1.25 MHz). The density of the black picture area is $D > 1.9$ (remission $< 0,1\%$).
